Instructions to completing the registration form

1. The form must be used when registering for SIK as a member.
2. It is important that the fields are filled in correctly.
3. Some groups pay half a contingent. This applies to unemployed, part-time employees and trainees. All other members pay normal (full) contingent.

If one changes from being unemployed, part-time or a trainee to be a full-time employee, one must pay a normal contingent. Here you need another form to document the changed conditions. The form is called "Change of member information".

4. It is important that SIK has registered each member correctly in relation to the contingent payment. And it is also important that you use another form, "Change of member information", if changes occur, for example moving to another city, to new workplace or moving from part-time employment to full-time employment or vice versa.

5. It is important that, when ticking, specify whether one is a monthly paid or a 14-day paid. When you are paid for 14 days, you must state your next payday after the registration. This is for the information of the contingent administration whether the salary payment is made in even or odd weeks.

6. Part of the total contingent goes to the local branch of the union for own activities, while another part goes to the union for common purposes. Pr. April 2022 the following total contingents apply to the local branches:

Aasiaat	325
Nanortalik	285
